<p>Public Comments</p>	<p>Ositadinma Akaemg, Chief Medical Director for HASTA/DC Health spoke on expanding Expedited Partner Therapy (EPT) to stop the spread of sexually transmitted diseases (STDs) and improve the health of District residents. EPT is the clinical practice of treating the sex partners of patients diagnosed with Chlamydia by providing prescriptions or medications to the patient to take to his/her partner(s) without the health care provider first examining the partner. Mr. Akaemg expressed that EPT is a safe, quick and convenient way to treat Chlamydia.</p> <p>Mr. Akaemg reported that it has been shown through research that Expedited Partner Therapy helps to address high rates of chlamydia and gonorrhea. Mr. Akaemg further reported that Expedited Partner Therapy can help reduce the risk of reinfection rates as well. Mr. Akaemg proposed a potential joint letter with HASTA that can be released to actively practicing DC Pharmacists informing them specifically about Expedited Partner Therapy (EPT) because of the knowledge gap observed by HASTA.</p> <p>Dr. White encouraged Mr. Akaemg to present this matter to DC Board of Medicine as well. The DC Board of Pharmacy expressed consideration of a partnership in expanding knowledge of Expedited Partner Therapy (EPT) and is looking forward to learn more about the program by inviting Mr. Akaemg to conduct a presentation before the Board at the next scheduled open session meeting.</p>
